

Name	Use Case: Delete Supplies Dentist wants to erase a supply from the clinic database.
Preconditions	Dentist has logged in
Postconditions	The supply that has been selected is deleted from the database
Primary Actor(s)	Dentist
Main Scenario	Actions:
	<ol style="list-style-type: none"> <li>1. User enters option: Delete a supply (Option 6)</li> <li>2. System asks user for the ID of the item they want to delete</li> <li>3. System identifies the supply in the database and erases it.</li> </ol>
Extensions	3_a System can't find any supply with that ID and therefore gives an exception error.
