

Name	Use Case: View Appointment
Preconditions	User has already logged in. User must be a Receptionist, Patient or Dentist.
Postconditions	The information associated to the appointment that has been selected is displayed
Primary Actor(s)	Receptionist, Patient or Dentist
Main Scenario	Action
	1. System displays options
	2. User enters option: view appointment
	3. System accesses the database and gets all the appointments
	4. System displays appointments info
	5. System goes back to action 3
Extensions	3_a User is a client, and the system accesses all the appointments whose patient id matches the client's id.
	3_b User is a doctor, and the system accesses all the appointments whose dentist id matches the doctor's id.
	4_a There are no saved appointments matching that criteria, so the system displays null
