User Story

Title:	Vilaboa Dental Clinic Database **User Story: Receptionist**	Priority:	Estimate:

User Story: As a [description of user], I want [functionality] so that [benefit].	As a receptionist, I want a database that allows me to view, create and modify appointments as well as patients basic information. As a result, all the necessary data will be organized in order to be more efficient when making appointments. I also want to be able to be up to date with the pending deliveries made by our dentists as well as confirm their arrival to our clinic.
Acceptance Criteria: Given [how things begin] When [action taken] Then [outcome of taking action]	Given the case a client enters the clinic asking to book an appointment, when I have checked that all the necessary data is in order and the availability of the requested dentist then I create the appointment. Given a supplier has delivered a supply to the clinic when I have checked that everything is in order then I modify the orders date and the supplies go to form part of the database.

User Story

Title:	Vilaboa Dental Clinic Database **User Story: Dentist**	Priority:	Estimate:

User Story: As a [description of user], I want [functionality] so that [benefit].	As a dentist, I want a database that allows me to view my appointments and the relevant information of my patients, as well as, having the possibility of ordering new or existing and viewing supplies when needed for my appointments. As a result, I will be fully prepared to perform my treatments.
Acceptance Criteria: Given [how things begin] When [action taken] Then [outcome of taking action]	Given the case a client has already set an appointment, when I have checked all the information regarding the client´s medical record and the basic info of the appointment, then I can modify or order order the needed supplies and perform the treatment accordingly.

User Story

Title:	Vilaboa Dental Clinic Database **User Story: Patient**	Priority:	Estimate:

User Story:

As a [description of user],

I want [functionality]

so that [benefit].

> As a patient, I want to access the clinic database, so that I can view my appointments and access my registered information so that I might change it when needed.

Acceptance Criteria:

Given [how things begin]

When [action taken]

Then [outcome of taking action]

> Given the case that I want to view my pending appointments or access my user information, when I have logged in to the clinic database successfully, then I can access and modify said data.

Vilaboa Dental Clinic Database **User Story: Supplier**		

User Story:

As a [description of user],

I want [functionality]

so that [benefit].

As a supplier for the dental clinic I want to be able to view all the pending orders and confirm the approximate date of arrival so that the staff in the clinic is aware of when the new supplies can be expected.

Acceptance Criteria:

Given [how things begin]

When [action taken]

Then [outcome of taking action]

Given an order has been placed by a dentist, when I have a clear idea of when the supplies will arrive then I can modify the date of the order accordingly.
